COUNTRY CLUB GATE ACCESS

Update March 1, 2017

The Country Club Gate remains closed due to severe road damage in the setback area, which was caused by the recent high water. Once water levels in the setback area have gone down TRLIA will repair the road damage and reopen the Country Club gate.

Update January 31, 2016:

The gate at Country Club has now been repaired and is open for public access to the Feather River Setback area.

Update January 16, 2017:

After TRLIA closed the gate due to the storm and high waters, someone vandalized the gate and broke in to access the area. Due to this, RD 784 has now blocked it with cement blocks until further notice.

January 5, 2016:

Due to the approaching storm this weekend January 7-8 the Country Club Gate will be closed beginning this weekend and remain closed until further notice please check back here for updates on the re-opening date.
