January 19, 2009

Ms. Elizabeth Lewis
GEI Consultants, Inc.
10860 Gold Center Drive
Rancho Cordova, CA 95670

Dear Ms. Lewis:

On behalf of the American Society of Civil Engineers, Region 9, I am very pleased to congratulate the

Bear River Setback Levee Project

project on being selected for the award of

ASCE Region 9 Flood Control Project of the Year

Projects eligible for the Region 9 awards were projects that received an award from one of the four ASCE Sections within Region 9 in 2008. We selected one Project of the Year Award and 15 Specific Project Awards from the pool of 50 eligible projects. Information regarding the awards is available at <http://region9.asce.org/awards.html>.

The ASCE Region 9 Board of Governors represents more than 18,000 ASCE members in the State of California.

The 2008 Region 9 Awards will be presented during the Awards Dinner Ceremony on February 24, 2009 in Sacramento, California. The President-Elect of the National ASCE Society, Blaine Leonard, is scheduled to attend to assist with presentation of the awards and honor the award recipients.

The ASCE Region 9 Project Awards are presented to the project owner and engineer of record. Please RSVP using the attached form to indicate if you will be able to accept the award at the Awards Dinner Ceremony. Region 9 will provide the owner with one complimentary registration for the Awards Dinner. We recognize that these successful projects are often the result of contributions from multiple firms and individuals. Anyone involved with your project is encouraged and welcome to attend the Awards Dinner. You are welcome to purchase registrations for as many additional guests as you would like and to forward the registration form to other project members.

Thank you for all you do to further the Civil Engineering profession! I look forward to seeing you in February.

Regards,

Jennifer Epp, P.E.
ASCE Region 9 Governor and Awards Committee Chair
